Location

Brighton

Cost

\$7,000 OBO

Notes

The Vermeer TS-40S is a hydraulic, 4-spade tree spade attachment designed to dig large sized trees. Commonly mounted on trucks or operated via loader PIN plates, it runs off a PTO or auxiliary hydraulics to dig, transport, and replant with a precise 40-inch diameter rootball. The spade is in good working condition and comes with the hydraulic hoses and controls.
