The Palisade Greenhouse complex offers the growing space and infrastructure required for large-scale production, all bundled within the business-friendly city of Palisade, Colorado. The 100,000 SQFT of greenhouse space is heated by two boilers (primary plus a backup) and cooled through evaporative coolers. The latter is powered by a recent \$240,000 electrical upgrade that included 3-phase power. Additional improvements include: a 9,198 SQFT warehouse, strategic fencing, a guard house, and office space. Whether petunias or commercial marijuana, the Palisade Greenhouses only lack a grower. Located at 1041 N. River Road, Palisade.
