

### CSU Short Course Set for July

The twelfth biennial short course, presented by CSU, GreenCO and Northern Water, will take place on July 12. The training will take place at Northern Water in Berthoud and cover the latest insect and disease issues, proper pruning, turf and weed identification, ornamental

grasses, irrigation technology, and an update on the state of Colorado's water situation. Morning topics will be held outside and afternoon sessions will be indoors. View the [full schedule and course descriptions](#) and you can register [here](#).

Attendees can receive Colorado Dept. of Agriculture pesticide credits and/or ISA continuing education credits.

### Customers Enjoy Plant Something Photo Contest

Last week 30 members started the fifth year of the popular Plant Something [photo contest](#). To enter the contest, customers share their photos on social media for weekly prize drawings now through July. The contest motivates customers to buy plants and potentially drives new customers through the social media exposure. Participating members are listed on the [Plant Something website](#). Plant Something is a free member benefit and its not too late to get involved. Contact [Allison Gault](#) for details.
